Abdulrahman Bahjat

Mechanical Engineering Student · Penn State · abodybahjat@gmail.com · abdulrahmanbahjat.com · github.com/AbdulrahmanB27 · linkedin.com/in/abdulrahman-bahjat-51b5112b6

SUMMARY

Mechanical engineering student who builds physical prototypes and ships software by directing AI coding agents.

EDUCATION

The Pennsylvania State University · Expected May 2029
B.S. Mechanical Engineering · Harrisburg, PA

- Coursework: Engineering Design, Statics, Dynamics, Mechanics, Matrices, Differential Equations, Programming for Engineers (MATLAB), Electricity & Magnetism

EXPERIENCE

Web developer · 2024
Sweet Moment Chocolates, Herndon, VA

- Directed AI coding agents to build a custom e-commerce store: catalog, cart, Stripe checkout and an admin CMS.
- Added a static export that snapshots the store into a free GitHub Pages site, for backups and the off-season.
- Wrote the requirements, tested every flow and drove bugs to fixes through launch at sweetmomentchocolate.com.

Staff · 2022 – 2023
Launch Trampoline Park

Intern · 2022
Pepco

ACTIVITIES & PROJECTS

Folding cardboard chair · 2025
Engineering design course, Penn State

- Designed, modeled and built a cardboard chair that folds and unfolds quickly using minimal material.
- Best-performing design in the class: it held the weight of four people.

Robot designer and builder · 2023
VEX robotics team, King Abdullah Academy

- Designed three robot concepts in Tinkercad from real VEX parts and fittings (Crab Bot, Scorpion, Spin Bot).
- Built the final robot: four-direction drive and an arm with 360° of motion; teammates programmed and drove it.

SELECTED PROJECTS

MyRoom · 2026
A daily planner that lives on your desktop
Technologies: React 19, TypeScript, Vite, Tailwind CSS 4, zustand, IndexedDB, Tauri 2 / Rust, Node.js, Vitest

MyKitchen · 2025
Recipe manager on the web, as a PWA, and on Android and iOS
Technologies: React 19, TypeScript, Tailwind CSS 4, Vite, Cloudflare Pages Functions, Cloudflare D1, Capacitor, Framer Motion
Live: abdulrahmanb27.github.io/MyKitchenCloudflare · Code: github.com/AbdulrahmanB27/MyKitchenCloudflare

SKILLS

Engineering: SolidWorks, Tinkercad, FDM 3D printing, VEX Robotics, Prototyping, Raspberry Pi
AI-assisted development: Directing AI coding agents, Writing specs and prompts, Debugging and bug finding, Testing and QA
Web: HTML
Learning: MATLAB (coursework), Blender (basic)

Updated 2026-10
